The registration deadline for each class is one week (7 days) prior to the class. Any registrations after the deadline will be added to a waitlist and will be added only if space is available. If there are not enough participants, the course will be cancelled and the participants notified.
These courses and the accompanying clock hours meet the requirements for Washington State Vocational Initial Certification, as required by the state of Washington, on the basis of business and industry work (WAC 181-77-041). They are taught by certified classroom instructors.

**Elements of Teaching: CTE 101**
Learn to implement effective classroom management strategies that meet the diverse needs of students. Lesson planning skills, methods of discipline and record keeping to meet state regulations will be covered in this course.

**Practicum: CTE 102**
Learn to address the diverse needs of students, considering cultural and linguistic considerations: learning disabilities, visual and perceptual difficulties, special physical and mental challenges, academic abilities and talents, social situation and background. Develop skills in using effective verbal, nonverbal and media communications for fostering active inquiry, collaboration, and supportive interactions in the classroom. Students will complete a self-assessment of instructional practices, develop a Professional Growth Plan, and create a portfolio as evidence of their learning.

**General Safety and Industrial Hygiene: CTE 103**
The purpose of this class is for participants to understand the common causes of accidents in order to reduce or eliminate accidents in shops, labs, classrooms, and worksites. Participants will understand and follow state and federal laws related to workers (students) safety and develop safety lesson plans related to the participant's specific CTE class.

**Advanced Instructional Techniques: CTE 201**
Provides participants with more advanced research based instructional strategies and classroom management techniques. The course is designed to expand the educator’s understanding of teaching, learning, assessment and engagement. It will provide further techniques to foster a positive classroom environment, including corrective, supportive and preventive strategies.

**Curriculum Design and Course Organization: CTE 202**
Develop a curriculum for your course, aligned with the EALR benchmarks, which reflects the vision/mission, outcomes and competencies, including safety and healthy practices and work-based opportunities, within the learning environment.

**School Law & Issues of Abuse: CTE 203**
Understand the necessity of awareness of legal issues as they pertain to the classroom including: the process where student discipline is involved; resolution of sexual harassment situations; The RCW, WAC, District Administrative Code, as governed by Washington law; copyright law as it applies to use of media and internet; and insurance issues. Learn to recognize the signs of abuse. Understand the legal responsibilities for reporting abuse and making referrals to CPS. Determine the teacher’s role in providing assistance to students who are victims of abuse and/or are abusing substances. Develop an awareness of enabling and co-dependency.

**Coordination Techniques: CTE 301**
Develop a philosophy of work-based learning. Gain an understanding of federal and state labor and industry relations. Learn how to utilize and share community resources. Learn methods of marketing, developing, implementing and managing Work-Based Learning programs.

**Student Personal Development and Leadership: CTE 302**
Apply cooperative learning, multiple intelligence knowledge, learning style knowledge and teamwork in the teaching of personal development lessons within the classroom and assess the results in terms of student learning. Compose a philosophy of personal development instruction/integration within classrooms.

**History and Philosophy of Career and Technical Education: CTE 303**
Examine the history of vocational education in Washington State. Understand how vocational education is funded at local, state and federal levels. Discuss current trends, issues and laws pertaining to vocational education. Learn to use research tools to create a marketing plan and explore career opportunities. Design student competency certificates. Discover ways to establish articulation agreements with local colleges.
